 joeltaillefer.com

Web Developer with strong skills in Python, HTML, CSS, React, and JavaScript, and experience with C and SQL.

Technical Projects

Trickipedia

<https://trickipedia.xyz/>

- Developed full-stack Django app, an encyclopedia of skiing tricks with user submitted videos, using Python, HTML, and CSS
- Implemented admin moderation tools such as editing and deleting entries in database

Music Share for Seniors Website

musicshareforseniors.ca

- I created the About Us, Our Team, Get Involved, and Blog sections using Webflow
- Worked directly with clients and one other dev to build website for non-profit organization that works with seniors in care homes

MHW Craftlist

joeltaillefer.com/projects/3

- Developed tool for the game Monster Hunter World using React and CSS
- This website uses API calls and a recursive function to allow users to look up crafting information for in-game weapons quickly and easily, information which is hard to find in game.
